

Leading Distribution of
Structured Cabling Systems
&
Solution for
Copper and Fiber High Quality Networks

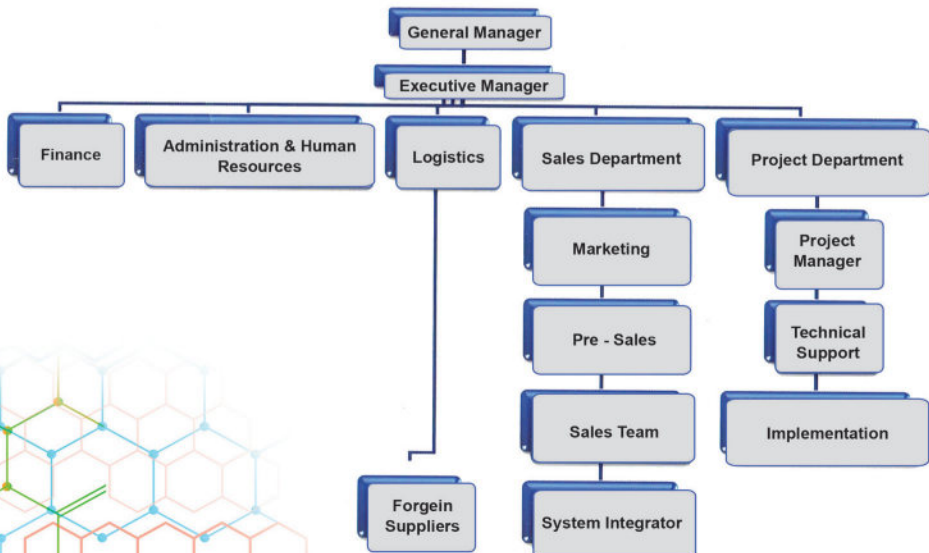

Bringing you tomorrow's
innovations, **TODAY**

About Us

- UNITECH incorporated according to the Egyptian laws in 2007. It is one of the most important wholesale distribution of information technology and data network products.
- UNITECH committed to develop and maintain the success of its intellectual human capital resources and stakeholders whether internal company or outside the company, as well as, stakeholders in EMEA region.
- UNITECH established a good trademark in the market through providing the highest quality and the best price with the best service after sale.
- We have the best engineers and consultants with long experience in the field of structured cabling information technological infrastructure of the networks of surveillance cameras, fire alarm, networks, internal exchanges and all related to light current and provide the best after-sales services.
- We have more than 10 years of experience in the fields of importing and distributing data communication & Networking Components and full solutions. We represent one of the international brands in the world as the Main Agency basis in Egypt; Osilan and a reseller of some of the largest brands such as Panduit, Legrand, Estap, Rittal, E-Lande, D-link, Premium-line, Cisco systems, Emirson, Superior-tech and more.

Our Organization Chart

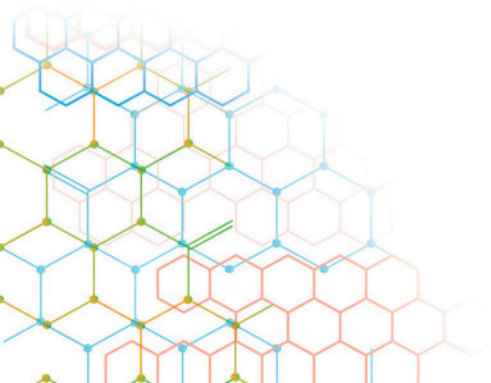

Our Vision

UNITECH is committed to build long-term relationships based on integrity, performance, value & client satisfaction. We are strongly committed to remain a positive contributor to the IT community, employees and partners. We seek to achieve leadership within EMEA region.

Our Mission

To make sure that our partners & stakeholders receive what they need to run facilitating their business operations as well as possible, with maximum efficiency and reliability, so we establish environment of innovative business solutions that aim to fulfill clients' needs, build long-term partnerships with different stakeholders; while applying ethical business-wise practices and maximizing exploitation of the interest of investment.

Connecting Minds'
and Cerating The Future

Our Service

UNITECH has long experience in the study, design and execution of technical and financial studies for telecom networks infrastructure. Our expertise spans from IT networks (LAN/MAN/WAN) to full scale of telecomtrunk and access networks.

Contemporary technology aspects are included in our technical portfolio to meet diverse communication needs (Fiber Optics, Copper, Wireless, CWDM, DWDM, 10G etc.) in cost efficient ways.

We also have unique experience in FTTH infrastructure design and rollout. Customers ranging from Telecom Operators to Public Utilities, Institutes, Industry and SMEs in Egypt and abroad have trusted us for the design and construction of their networks including development of operational procedures to maintain good performance and seamless operation.

➡ Network and Data Center Design

Turn-key telecom Networks

UNITECH undertakes turn-key management and implementation of Telecom Projects for operators, public and government projects and private investors.

We offer full Project Management Team and run Procedures to plan, follow-up and re-fold to successfully satisfy technically demanding and time specified projects.

In house engineering and long term prequalified outsourcing allows on time and cost effective provision of technical solutions that secure service management value for our customers.

Resource Management and Logistic Support is key service we offer to our customer to maximize efficiency and minimize cost and execution time.

IT integration & Control networks

UNITECH offers all components of complete solutions of:

Data Centers, Office Networks, Buildings, Highways, Industrial environment, Petroleum Sector Networking & Construction Networking.

Integration of these Networks include all works related to a complete Network System.

Network solutions cover

 VIDEO Conference, VoIP And CCTV

 Data (Ethernet, Fiber Connections)

 Building Management Systems

 Security networks

 Access Control

Products

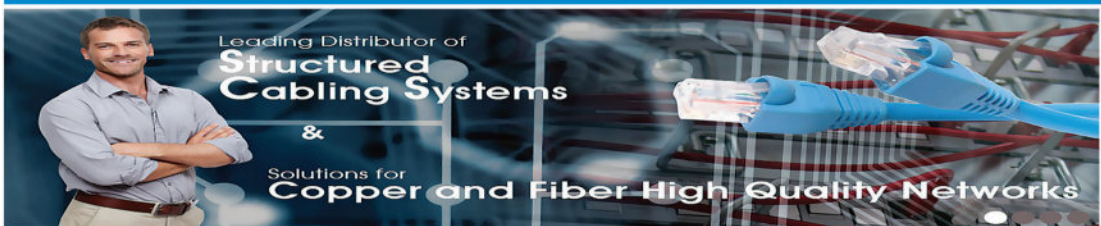

Fiber Solution

Our Partners

Legrand provides advanced, highest performing structured cabling systems and solutions for mission critical applications. They are perfectly suitable for LAN and datacenter/SAN installations in many different markets including finance, transport, healthcare, administration etc. Combined with the group's infrastructure solutions for cabling - racks, cabinets, Cablofil wire mesh cable trays and raised floor systems - these systems ensure real network stability. Via its specialist estap, legrand also offers complete solutions for Datacom enclosures, from standard applications to bespoke versions.

Osilan Ltd are leading experts in the provision of structured cabling systems in the UK, North America, Asia and Now MEA Markets.

Osilan Ltd is one of the leading UK manufacturers of fiber optic , networking and CCTV products and accessories. Osilan offers premium quality fiber optic and networking products for the transmission of signals for data, sound and video applications across the Network Industry.

Panduit was born from innovation. In 1955 we launched our first product, Panduct Wiring Duct, a new invention that uniquely organized control panel wiring and allowed new wires to be added quickly and neatly. Since that time Panduit has introduced thousands of problem solving new products and remained committed to providing innovative electrical and network infrastructure solutions.

Our Partners

Estap is a major player in the Turkish electronics enclosures industry since 1989. ESTAP A.Ş. specializes in enclosures for data communication equipment, utilising basic 19" racks, cabinets and accessories, to provide solutions for networking, servers, datacenters, outdoor applications, industrial usage and telecommunication. In 2008, Estap was acquired by the **Legrand** Group.

Rittal Corporation manufactures and distributes industrial and IT enclosures, racks, and accessories for industrial, data center, outdoor, and hybrid applications. It offers small, compact, IT network and server, IT wall-mounted, and outdoor enclosures; consoles/PC case systems/industrial workstations; operating housings/support arm systems/stand systems; hygienic design products; and stainless steel products. The company also provides power distribution systems; liquid cooling products, IT liquid cooling products, heaters, and climate control accessories; IT infrastructure products; and system accessories, which include base/plinth, base, baying system, roof/wall mounting, interior installa...

Rittal – The System.

Faster – better – everywhere.

The whole is more than the sum of its parts. The same is true of "Rittal – The System."

With this in mind, we have bundled our innovative products from the areas of enclosures, power distribution, climate control and IT infrastructure into one system platform for you. Supplemented with our extensive range of software tools and global service, we create unique added value for you

LANDE is a manufacturer of 19" racks, cabinets and enclosures, accessories with the highest level of knowledge in Turkey. Lande was established by a team that leads the sector with its experience of 20 years in order to develop and market innovative, ergonomic, economic and functional products. Lande is a professional solution partner with its 19" Rack Cabinets and accessories, Telecom Field Cabinets (indoor/outdoor), Server and Datacenter Cabinets and a wide range of further products for IT sector. Lande introduces a new concept in the sector thanks to its affordable and practical high-quality products designed according to the ever-changing market conditions and customer requirements. With the state-of-the-art equipment, machinery and experienced management staff and workers, high-quality products are manufactured with high capacities in the production facilities which were established in an enclosed area of 20.000 sqm at Eskişehir Organized Industrial Zone in 2012. The ERP system is implemented in all processes and the entire

system is monitored faultlessly. Lean production means and tools are used in production lines and continuous improvement is achieved with Process Approach. Lande products and service are certified to Quality Assurance System TS EN ISO 9001. Environmental awareness is prioritized. Lande has a production capacity of 1000 pieces/day.

Our Partners

Transition Networks is a global developer of reliable, high-speed Carrier Ethernet and fiber-optic network solutions.

Transition Networks offers network integration solutions, which improve performance today and are scalable to also meet future requirements. We create network solutions that optimize existing infrastructure in a way that minimizes capital and operating expenditures, providing added bandwidth, distance and security to legacy networks. Our solutions enable you to migrate your existing networks for needed performance, monitoring and automation; all with industry-leading data networking experience, service and support.

Shaping Future Networking

Innovation

Quality

Sustainability

Founded in 1993, PLANET Technology Corporation is a leading global provider of IP-based networking products and solutions for small-to-medium-sized businesses, enterprises, and network infrastructures of IoT, IIoT and IoV applications. PLANET Technology has been focusing on the R&D of the transmission-based network and communications solutions since its establishment in 1993. At the release of its slogan "Shaping Future Networking", PLANET demonstrates its determination to shape the future of networking by continuously providing innovative network solutions to seamlessly connect the IoT, IIoT, and IoV devices.
